

# *The Luxury Lifestyle!*

(free e book)

Kick-back, and Watch the \$\$\$ Pile-Up !

Fellow entrepreneur,

Here is your ticket to the Luxury Lifestyle.

Congratulations on taking the first step to online success!

Many people dream of living the life they want, but few act on it.

There is so much money to be made - go after it!

This report focuses on one thing, making money online. After years of experimenting with one system after another, I finally hit on the simplest, most powerful money generating program available anywhere, and I am here to share my secrets with you, so that we both can succeed.

Making money on the internet can seem like an unsolvable mystery. The truth is, 98% of all people who start an online business fail to make even \$100.00 ever. If you don't have any guidance, you will probably grow frustrated, and give up. If you stayed with it, you could eventually learn everything on your own. The problem is, there is so much information, taking you in so many directions, it could take you years to figure it out alone. Starting out, I put in a lot of time and money of my own, and tried almost everything out there, chasing "The Next Big Thing". After years of study and crafting, I finally cracked the code!

No one really wants to reveal the so-called "secrets" to making money online. Because the information is so hard to come by, it is jealously guarded by most. The truth is, the information is available, but it is very hard to separate what works from the distractions and outright lies. It turns out, that there is no "secret" to making internet income, only a proven formula that you must tap into. You need to get past the bull, and follow a proven model for online success.

=====  
Lesson #1 Selecting The Best Program  
=====

It's 7:05 A.M. On Monday, you are stuck in traffic and late for work. You start to feel ill at the thought of the day ahead. Only ten hours until you are back home!

I know exactly what this is like, because it was my reality for so many years. I had to learn the hard way that there is another way, and all you have to do is reach out and grab it.

<http://www.quasarblast.com/cashcrate>

If you want to make money online and maybe quit your day job someday, why do you think you haven't done it yet?

There's only one thing that separates you from the top 1% of successful people who ARE making an absolute killing online.

They DO know something you don't know. They have a great product, and use underground techniques which only elite internet marketers know about.

These are hidden techniques, because the 'gurus' will never tell you about them.

Why...?

Because they are greedy, that's why. They couldn't care less whether you lose money on methods that don't work. They laugh behind your back while they make millions every year.

You simply don't stand a chance against these greedy gurus unless you have an insider working for you to share their secrets with you.

The good news is that Ludwig E. Parker has spent the last few years lurking in the shadows, and learning every last secret there is. He has watched exactly how they make such vast amounts of money online so easily and

has 'borrowed' their top secret techniques.

Now, for the first time ever, these techniques are compiled in one easy to use program. This is the only system I have found that actually works! Start using it today to make YOUR fortune.

<http://www.quasarblast.com/cashcrate>

You will get everything you need to start making money right away. If you are serious about making it BIG, don't spend your money on useless guides and hyped-up ebooks that don't work.

=====  
Lesson #2 Get Web Hosting For One Cent  
=====

If you want to have your own money making website, and don't want to be an affiliate promoting someone else's product, you will need web hosting.

A hosting provider houses the online computers (servers) that store and deliver your website to people surfing the internet. Your site is available at all times without you or your computer needed.

The host handles all web traffic and website file storage, providing instant online availability of your website regardless of the number of customers visiting.

With the purchase of Ludwig E. Parkers incredible system "The Luxury Lifestyle", not only do you get everything you will need to start making money FAST, (including websites where you keep ALL of the profits) you can get the first month of web hosting for ONE CENT.

<http://www.quasarblast.com/cashcrate>

The servers provide all the disk space and bandwidth you will ever need, so your site will never run slow or go offline. Customer satisfaction is the highest in the

business, with live agents available 24 hrs. to assist you.

Free hosting does not work with a business. You can try it, but you will waste some time. You don't want someone else to have control over your sites as is the case with free hosting. Also, it is hard to get indexed in the search engines using a free hosting subdomain.

<http://www.quasarblast.com/cashcrate>

=====  
Lesson #3 Free Advertising  
=====

In this lesson I will discuss website traffic. Without it, you really have no business. There are many ways to get free traffic, like contributing to article submission sites to build backlinks and hits, post to blogs with your affiliate signature line, promote to facebook and myspace etc. Using forums and banner exchanges works too.

You can waste a lot of money on ineffective advertising. Use only a quality search engine to purchase PPC (Pay Per Click) ads through.

Don't buy web traffic from other sources, especially "expired domain" traffic, and "10,000 Guaranteed Hits" type sites, you will regret it, because you will get no results.

Today, if you order Ludwig E. Parker's detailed money making system "The Luxury Lifestyle", you will get OVER ONE HUNDRED DOLLARS worth of FREE advertising credits to launch your business.

<http://www.quasarblast.com/cashcrate>

Traffic exchanges are a good FREE way to build traffic too, however, it is not as

targeted. You view other's sites in exchange for advertising credits for your website.

In order to get good search engine ranking, it is important to have links incoming to your web page. If your site has great content, people will automatically want to link to it.

Original content is what draws the search engines, and the more pages of original writing your website has, all the more visitors you will get. Organic links will result from your pages unique content.

Article marketing can also help you to build many incoming links. Contact webmasters to exchange links on similar topics, or try signing up with a link directory. Directories provide people a way to find your site, plus an inbound link for you to increase your page rank.

Be sure to use all the methods of generating traffic, but become well-versed in each method before moving on to the next. Do not spread your efforts in too many directions at first.

Order "The Luxury Lifestyle" now to get your Targeted Case Studies that take you by the hand, and lead you step-by-step through every detail.

=====  
Lesson #4 List Building  
=====

So you have a product and website, and are working at generating traffic, but something is missing, the opt-in, or "squeeze" page needed to build your email "list".

This page only has one function, to get people to opt-in or subscribe to your list. Your list keeps you in contact with potential customers, so you can offer the latest products they want.

"Luxury Lifestyle" members get a FREE service to create professional money cranking squeeze pages.

<http://www.quasarblast.com/cashcrate>

Marketers say that a list with 3000 subscribers will earn you \$3000 a month in backend sales, averaging one dollar for each list member.

Backend sales are follow-up offers built into your autoresponder (more on this tomorrow). Backend offers can account for a large portion of your income. Continue to grow your list into the hundreds or thousands and you will see the power of the squeeze page and your list.

Your squeeze page should have a bold headline, and show the benefits of your product. You need to show the benefits and not the features. This is important in advertising. Offer a solution to a problem. Give something good away as incentive.

After the person signs up for your list, they will be redirected to the site of your choice, such as your main web page or sales page.

A squeeze page has the best chance to get a visitor to sign up for your list. The visitor either signs up, or navigates away from the page. There are no other options on the page.

Get lifetime access to the exclusive "Luxury Lifestyle" members area - everything you will need in one place.

<http://www.quasarblast.com/cashcrate>

For truly hands free automation, you need an autoresponder in order to send messages to your list automatically.

---

---

## Lesson #5 You Need An Auto Responder

---

---

An auto responder is an automated system of sending email messages. The messages are pre-loaded into the auto responder, and sent out on a time schedule you set.

The auto responder is essential to build an e-mail list and send automated messages without spamming. The best thing is, each e-mail will be personalized for each member of the list. Including name and other info you may have gathered.

The auto responder is a must have tool for success. Leading marketers have found that potential customers may need to see your offer several times before buying your product.

With an auto responder, your sales will become automated. You won't have to worry about contacting new customers individually. Everything is pre-loaded and pre-scheduled, per your directions, leaving you free for other things.

In the members area, you get unlimited use of your own pro autoresponder, for free!

<http://www.quasarblast.com/cashcrate>

Your auto responder company will provide you a "form code" to place on your website or squeeze page. It creates the form used to "capture" list subscribers.

The form can be customized to require various information, and to match the look of your site. Your email messages should contain useful content, you want people to continue to open them.

Give courses, books, audio tips, videos, or create your own newsletter. If your list is large enough, you could begin to sell advertising space to other companies.

Remember, "Luxury Lifestyle" members get Targeted Case Studies that leave no room for error with your efforts.

=====  
You Work Too Hard  
=====

Can I ask you a personal question? How much do you earn each day, and how many hours do you have to work in order to make that money? Second question: How HARD do you have to work to make your money? Think about this for a few seconds.

As you read this e-mail, there are a growing number of people who get up every morning, switch on their PCs, (still in their pajamas) "work" on their program for less than an hour and make an EASY income for the day!

The rest of their time is FREE to do whatever they want...play golf, attend their kids' functions, go shopping, take vacations... or just kick-back and watch everyone else around them stressing out with their crappy 9-5 jobs, dealing with demanding bosses and rude customers.

Leave the rat race behind you. Start Today!  
<http://www.quasarblast.com/cashcrate>

If you don't know the REAL secrets to succeeding online, you will find it very hard to make any money.

I know this because I myself was a victim of the "Internet Gurus" for more than a year, spending lots of money buying worthless online traffic and not making any profit on the products I was advertising.

Now that I have uncovered the hidden secrets, I find it very, very EASY to make money online.

Maybe you're just getting started online, or perhaps you're already involved, and having no luck. I know exactly how you feel... I've been there and felt the kind of frustration that comes from losing money.

But the only thing standing between you and online success is having the right KNOWLEDGE!

Get the secrets now:

<http://www.quasarblast.com/cashcrate>

This is knowledge that over 90% of internet entrepreneurs don't have. That's why most people fail to make money online. The few "experts" that have this knowledge either don't share it with you or don't explain it in simple, step-by-step detail so you can actually make real money with it.

Last Call To Find Success
